ShowMe Barcode

The real-time, fully integrated IBM i barcoding solution with professional printing, scanning and wireless transactions

ShowMe Barcode

" Barcoding on the IBM i has never been simpler. This robust but powerful system has provided our business with the complete solution. "

ShowMe Barcode

Powerful, robust barcoding solutions

Successful business employ barcoding within all aspects of their operation. From tracking work in progress, directing shipments to identifying appropriate parts, material & document control, the benefits of accurate information, real-time visibility and a highly efficient work force are clear.

- Support operation quality with improved accuracy of 99+% achievable
- Remove manual errors and associated time and labour to resolve them
- Free up workers and reduce the associated required paperwork
- Enjoy better data collation and automation with real-time visibility

Enjoy a leap in efficiencies through real-time wireless barcode transactions at the point of activity without compromise. Adopt touchscreen GUIs with full validation, improve picking with graphical representations of items and live counts, running totals and transactions without pause or error.

Improve processes and communication by providing real time statistics, leaderboads, messaging and activities direct to the user, dashboards or warehouse TV screen.

Full integration with your IBM I enterprise ERP

Intuitive & Interactive

Design and Print

Wireless

Transactions at point of delivery

Real-time

ShowMe Barcode

Create your own custom barcode programs or enjoy fully realised turnkey solution from installation.

GUI's

Using a graphical interface on your Wireless Barcode Device, ShowMe Barcode transforms business processes by allowing you to deploy custom applications in areas such as stock movements, shipping, work order picking, material movements and more. And best of all, the transactions are always performed in real-time.
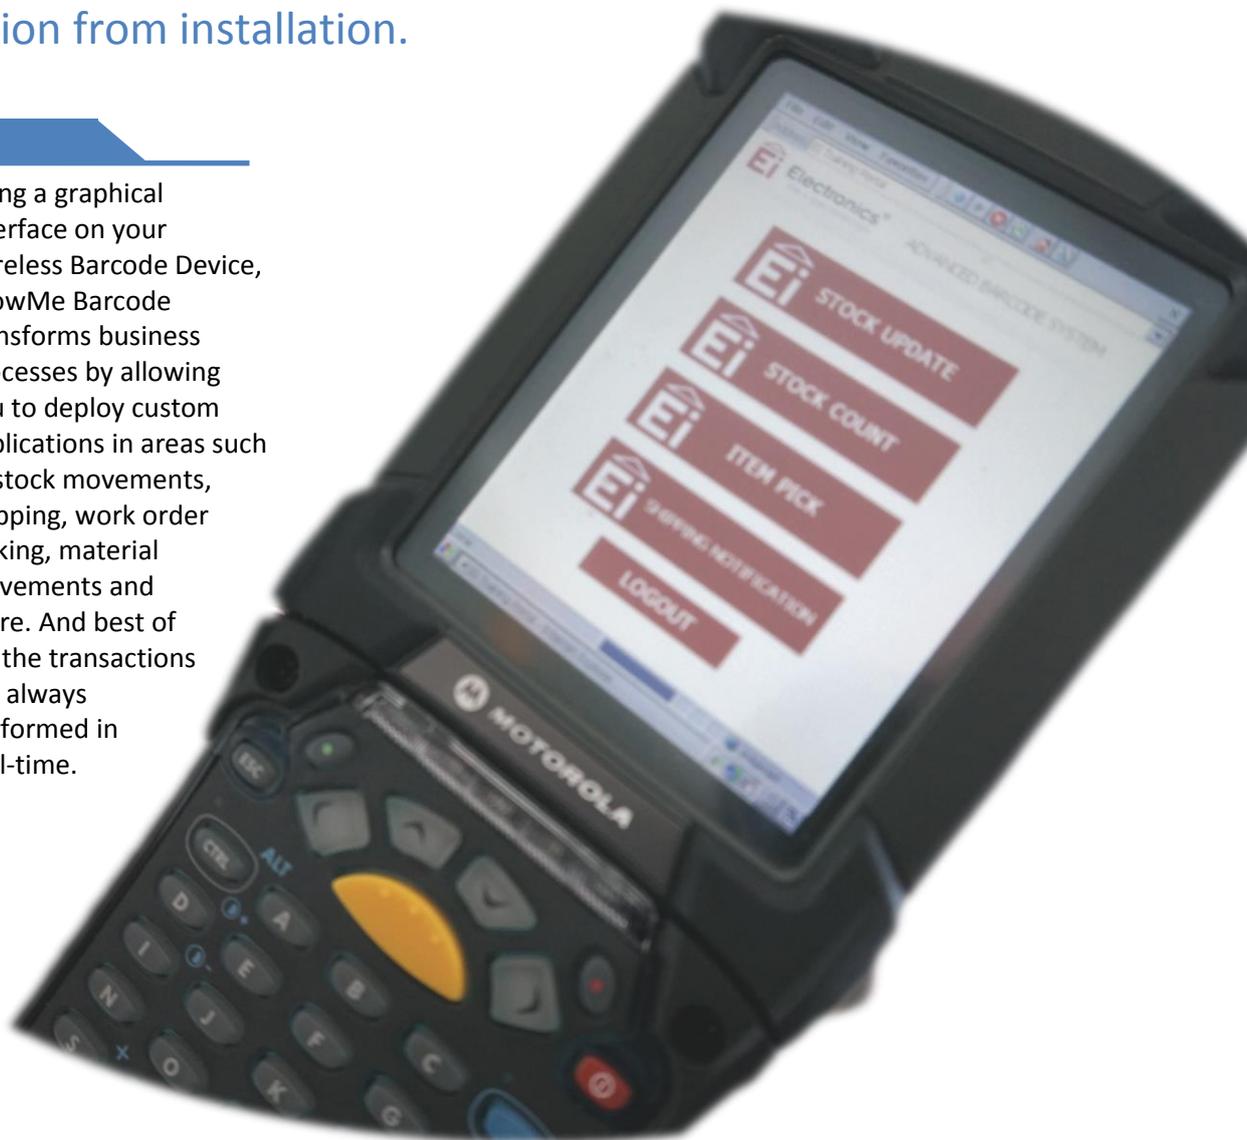

Integrated

ShowMe Barcode helps companies running on IBM i, integrate barcode solutions to streamline their operations while increasing efficiency, improving productivity, and driving down costs. From custom barcode forms, labels and applications to real-time, validated transactions with your IBM i enterprise, no other platform offers more.

Scalable

Fully scalable with no 'per user' licensing, ShowMe Barcode provides a full turn-key solution including the creation of printed barcode labels and forms and/or the platform to develop your own applications.

ShowMe Barcode

Real-time solutions for 'point of transaction' visibility and quality.

Real-Time

ShowMe Barcode runs in real-time, providing streamlined data capture through live transactions at point of process. Business who adopt our technologies see immediate transformation. From tracking work in progress, directing shipments to identifying appropriate parts and material and document control, the benefits of accurate information, real-time visibility and a highly efficient work force are clear. Operators are less stressed and managers have up to the minute information and have the confidence that transactions are being processed accurately and on time.

> "Streamlining data capture through live transactions at point of process.
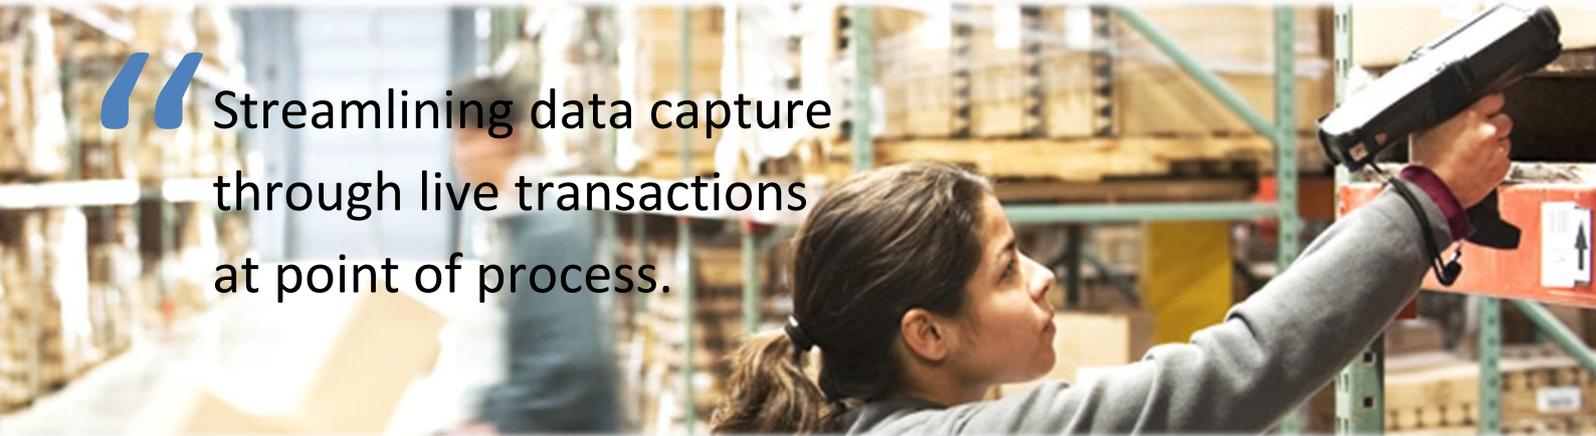

Reduce Errors

Using ShowMe barcode applications provides business the opportunity to reduce errors and make huge gains in efficiency. ShowMe Barcode works in parallel with your ERP providing appropriate information and instruction to the barcode operative while providing fully validated, live reading and writing to your IBM i.

.

Improve accuracy

Integrating real time optical barcode scanners and your IBM i enterprise ensure your inventory is constantly updated in real time. Enjoy an inventory accuracy of 99.9% while simultaneously improving efficiencies and visibility.

Understand KPI's and provide analytics to those who need it.

Dashboards

Need real-time information and analytics? ShowMe Barcode includes the full analytical capabilities of ShowMe to provide a real-time 'mission control' view of operation as well as giving real-time Key Performance Indicators (KPI's) to those who need it. Create 'at a glance' graphic updates for mobile operatives, an 'objectives/leader-board' chart for a plasma screen within the warehouse or provide real-time dashboards for managers/supervisors. Analyse operative efficiency and productivity, understand 'most picked' item by time/date/location statistics, or drill down through warehouse statistics... the options are vast and fully configurable to provide easy to understand real-time view for any information you require.

Analytics

Discover trends and understand behaviour through ShowMe TurboCube technology – our native and real-time IBM i OLAP cube engine that will allow you to 'slice and dice' information to compare and contrast multiple views with just a click of a button. Need to export results to Excel? No problem, find the view you need and press the excel button – simple.

Tailored Solutions

Let Utilities 400 help you make your business more efficient and productive. Our team of experienced professionals will work with you to put together the right combination of hardware, software, wireless infrastructure, and services you need to optimise your operation and help you see a profound return on your infrastructure investment.

Our strength lies in our deep understanding of your IBM i infrastructure and knowledge of how to seamlessly integrate automated data collection into your business systems. Whether you're implementing new systems or enhancing your existing systems, we provide solutions to solve your unique integration challenges.

What we offer our clients:

Service and Support

Function	Feature
Service	A Complete service including Consultancy, Software, Equipment, Implementation and Training.
Experience	All popular media formats (JPG, TIFF, PNG, AVI, MPG, etc.)
Advice	Advising on barcode best practice and warehouse management systems.
Technology	Leading edge technologies including the latest in hand held devices and using the Microsoft .NET software development tools.
Survey	WiFi Site Surveys and recommendation of the right equipment for your project.
Solution	Complete bespoke solution development including barcode printing, scanning and process automation.

Technology Requirements

Function	Feature
Server Architecture	MS Windows / IBM i / Cloud
ERP	Any ERP IBM I OS 5.3 and above
Device Compatibility	ShowMe Barcode is fully compatible with dedicated devices such as wireless scanners and RFID readers from Symbol Technologies, Intermex, PSC, Motorola and DAP Technologies running on Pocket PC, Windows CE or any other OS that supports a browser.
