

ShowMe+

B2B portals and Application
Development for real-time,
browser based
bi-directional transactions

Built on **ShowMe** technology and using the 'drag-and-drop' design studio, **ShowMe+** provides an all-in-one platform for mobile, web, GUI, and application development

ShowMe+ enables bi-directional transactional processing to and from a web browser and your IBM i database(s).

- Deploy interactive business portals
- Create a web based store front for your business
- Design new GUI applications over your legacy green screen programs
- Build applications anywhere! The drag and drop design studio is browser based
- Quick to deploy - one template for multiple portals
- Modernise 5205 sessions with web based interface

“

Wish ShowMe+ as the backbone of our application development, the opportunity for our IBM i enterprise applications has expanded considerably. We've removed the shackles of green screen and now, we've solutions such as real-time barcoding solution within our warehouse and a full-scale, multi-faceted B2B web shop for our customer.

Adrian Lawson | MIS Manager | Simon Jersey.

Create browser based GUI's, build business portals – quickly and without any programming...

ShowMe+ provides an IBM i development platform for your IT department without the need to program RPG. Using simple business definitions with a drag and drop design studio, you can build GUI applications with ease.

Create compelling GUIs

Reports at a touch of a button

Advanced security and encryption

One Enterprise License

Browser based deployment

Revolutionise the way you develop applications. **ShowMe+** provides the technology to build compelling browser based GUIs that can span multiple devices

Using the latest in internet and browser technologies, **ShowMe+** is a develop once, deploy anywhere solution to enable you to bring state-of-the-art applications for multiple devices, quickly.

Create and deploy secure business portals for your clients, partners and suppliers to have access and act on information prevalent to them. **ShowMe+** provides best-in-class presentation of data with log-in dependent display environment.

ShowMe+ provides the best way for your stakeholders to view your data. From multiple graphing options to the ability to pivot, compare, contrast and export results, ShowMe provides the intelligent way to analyse data.

Deployed through a browser, **ShowMe+** allows users to view their data on whatever device they'd like. Dashboards can be developed for all form factors, from desktop PC to mobile devices.

Export reports with a touch of a button into Microsoft Excel. Spreadsheets can be automatically formatted so on opening, the data can be presented with pivots, charts, tables and graphs.

Security is built into **ShowMe+**. Use your one secure sign on for all your applications and advanced filtering means that you'll only have access to the data you require. **ShowMe+** makes use of your Active Directory signatures.

ShowMe+ enjoys its own built-in drag-and-drop design studio that allows you add you own graphics and corporate identity to build your own web pages, portals and dashboards WITHOUT any HTML knowledge.

We don't leave the green screen user in the dark, **ShowMe** allows you to deploy intelligence to users who demand their results be delivered via a 5250 session.

Only one single Enterprise license is required for ALL applications developed in **ShowMe+** (note, check for ERP licensing restrictions). Deployed over a browser, this means that ALL stakeholders can use the applications they need on a device of choice when needed.

ShowMe+ provides the best of both worlds for both programmers and non-programmers alike. Using the drag-and-drop design studio means ZERO coding required. If you are a coder, you can hook in your programs to the GUI applications. There is no need to have access to, or change the source code.

ShowMe+ uses browser technology to deploy your portal or graphic user interface. No need to install PC Client software, applets or ActiveX controls.

Eliminate maintenance and software support. Build your own bespoke applications and remove the need to pay maintenance for software you no longer need.

ShowMe+ provides a best-in-class enterprise experience while retaining our time-tested functionality of our IBM i applications. Using the ShowMe Design Studio provided a what-you-see-is-what-you-get gateway to building great browser based GUIs. Its drag and drop functionality not only made the task easy and quick but simultaneously allowed us to use our own corporate identity.

Jim Stien | IT Manager

ShowMe's rich functionality enables users to perform find what the data they need, where, when and how they want it.

Learn about more IBM i solutions from the **Utilities 400** enterprise suite.
